EDUCATION

Annamalai University, Chidambaram

Bachelor of Engineering in Computer Science and Engineering (Data Science)

2020 – 2024

8.48/10 CGPA

TECHNICAL SKILLS

- **Languages:** Python, SQL, JavaScript, PHP
- **Web Development:** HTML5, CSS3, Bootstrap, Responsive Web Design, Cross-Browser Compatibility
- **Backend & Database:** MySQL, REST APIs, Authentication
- **Data Analysis:** Pandas, NumPy, Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA)
- **Machine Learning:** Scikit-learn, TensorFlow, Classification, Regression, Natural Language Processing (NLP), Model Evaluation
- **Visualization:** Power BI, Tableau, Matplotlib, Excel
- **Tools & Version Control:** Git, GitHub, Jupyter Notebook, Google Colab, VS Code

EXPERIENCE

The Barn Dental, United Kingdom

Jun 2026

Freelance Web Developer, Remote

- Developed a live UK dental website with responsive design and modern content updates.
- Resolved front-end issues directly with the client based on ongoing feedback and requirements.

XL Management Services, Chennai

Mar 2025 – Sep 2025

Full Stack Trainee

- Built and maintained 5+ responsive web apps using HTML, CSS, JavaScript, and PHP for real clients.
- Diagnosed and resolved 20+ technical issues through systematic debugging and troubleshooting.
- Improved website load performance by 18% through rigorous testing and code optimization.

Shiash Info Solutions Pvt Ltd, Chennai

Jul 2022 – Sep 2022

Data Science Intern

- Built a scalable data pipeline processing 50,000+ records using Python and Pandas.
- Improved sentiment analysis accuracy from 72% to 88% via feature engineering and tuning.
- Reduced data inconsistencies by 25% through systematic cleaning and preprocessing.

PROJECTS

Womandura – PCOD Support Web Application

- Built a full health tracking app using HTML, CSS, and JavaScript, improving interaction efficiency by 30%.
- Added authentication and dashboard features to securely manage 100+ user health records.
- Identified and fixed 15+ bugs through systematic debugging and testing, improving reliability.

Job Market Analysis Using Python

- Analyzed large-scale job market datasets with Pandas to identify in-demand skills and salary trends.
- Performed data cleaning and exploratory analysis to uncover hiring patterns by location and domain.
- Visualized key results using Matplotlib to highlight top roles, locations, and trends.

Gastrointestinal Disorder Detection Using RNN

- Built a deep learning RNN model in TensorFlow, achieving 87% classification accuracy.
- Cleaned and processed 8,000+ medical images via normalization, resizing, and noise removal.
- Improved model performance by 12% through iterative tuning and error analysis.

CERTIFICATIONS

- **Deep Learning – IIT Ropar (NPTEL)**
- **Machine Learning with Python – IBM (Coursera)**
- **Data Visualization: Empowering Business with Insights – Accenture (Forage)**

Score: 60%
